

Increasing Your Energy IQ to Boost Efficiency:

Pinpointing Problems, Building Awareness, Funding Improvements

Wednesday, July 19, 2006, 7:15 am to 1:30 pm

Good energy management practices can help you:

- Save up to 20 percent on energy costs on an ongoing basis with no capital outlay
- Optimize investments by identifying and prioritizing your energy savings opportunities
- Benchmark progress towards energy conservation cost reduction goals
- Raise awareness of energy usage and conservation goals and acknowledge positive results

Operate your facilities more efficiently...

Learn from energy experts how to differentiate and manage energy end-uses to identify the best opportunities for reducing energy costs. This is the second in a 3-part series that will help you identify and implement the most cost-effective and beneficial energy projects for your school. This workshop will focus on specific technologies, practices and trends.

Who should attend?

Energy and facility management staff from schools, colleges and universities in the Pikes Peak region, as well as the design and engineering professionals who serve them.

Register now!

Registration is free, but space is limited. A complimentary continental breakfast and lunch will be provided. Register online at www.coloradoenergy.org/calendar by clicking on this event in the July calendar or call 719-668-8080.
